

Providing **students** every opportunity to demonstrate their learning

Offer a choice board: Allow students to share a video, audio file, or written description demonstrating their learning.

Copy an assignment from your fall Schoology course to your spring Schoology course and assign to the students who still need to complete it.

Create an Academic Success Agreement outlining activities that students can complete to show learning.

Create (and share) one Google doc per student. Add learning activities for students to complete to show their progress.

Use evidence outcomes (from standard) and have students provide any evidence from class that demonstrates they accomplished that outcome. (Use sheets, docs or slides.)
